WALL STREET SHIBA

WHITEPAPER

Introduction

Back in 2020, the original Shiba Inu rose from internet obscurity to a global phenomenon, igniting a meme-fueled mania that flipped the script on what a token could be. He showed us that power didn't have to wear a tie; sometimes, it wore a leash. But while the world laughed, he listened. While others chased pumps, he watched. And as the market evolved, so did he. The Shiba of 2020 was a meme. But the Shiba of today? He's a machine.

Wall Street Shiba is what happens when that meme grows up. No longer just a symbol of hype, he's a strategist. A survivor of the bear markets. A scholar of the charts. He's walked through the chaos of DeFi, studied the playbooks of Wall Street, and armed himself with AI and blockchain precision. He didn't fade like the rest; he adapted. Now, he returns not as a joke, but as a movement leader.

Backed by real products and a real vision, Wall Street Shiba empowers his community not only with the tools to tokenize their ideas but also to outsmart, outtrade, and outlast the market. Because every meme grows up eventually. Some vanish. Some fumble. But this one? This one built an empire.

What is Wall Street Shiba?

Inspired by Shiba Inu spirit, **Wall Street Shiba (\$STIBA)** is a new financial archetype born at the intersection of memes, markets, and machine intelligence. Powered by AI, driven by DeFi, and motivated by the raw energy of internet culture, Wall Street Shiba is the world's first ICM-native memecoin, redefining what it means to be part of the next financial revolution based on ideas.

Wall Street Shiba is the memecoin for everyone with an idea and the courage to act on it. In the era of Internet Capital Markets, \$STIBA empowers dreamers, builders, traders, and creators alike not just to participate but to shape the future of finance. Whether you're a degenerate with a hunch, a strategist with a vision, or a meme lover with a mission, \$STIBA gives you a platform where your ideas can gain traction, funding, and community all without gatekeepers. Backed by AI-powered STIBA Labs, Bark Street 101, and community-driven momentum, \$STIBA transforms ideas into action and action into alpha. This is finance fueled by artificial and collective intelligence.

STIBA AI Exchange

STIBA AI Exchange is the next-generation trading hub at the core of the Wall Street Shiba ecosystem - a decentralized exchange (DEX) enhanced by artificial intelligence and built specifically for the high-speed, high-volatility world of memecoins and Internet Capital Markets (ICM).

Unlike traditional DEXs, STIBA AI Exchange goes beyond token swaps. It acts as an intelligent trading layer that combines AI-driven insights, on-chain analytics, and community sentiment modeling to help users make smarter and faster trades. Whether you're a seasoned trader or a meme-curious newcomer, the exchange adapts to your level of experience.

- ✦ **AI-Powered Insights:** Surface trending tokens, hot liquidity pools, and potential "alpha" trades using predictive models trained on sentiment, social signals, and market velocity.
- ✦ **Smart Swap Routing:** Get the best execution with AI-optimized routing across liquidity pools, minimizing slippage and maximizing gains.
- ✦ **Custom Trading Dashboards:** Tailor your interface with modular widgets - from gas fee tracking to live meme scoreboards - powered by data that actually matters in the degenerate economy.
- ✦ **Decentralized & Permissionless:** All trades remain on-chain, fully non-custodial, and governed by the community while \$STIBA fuels the ecosystem.

STIBA ICM Labs

STIBA ICM Labs is the innovation core of the Wall Street Shiba ecosystem, a think tank and product launchpad built at the crossroads of memes, machine intelligence, and the Internet Capital Market (ICM) movement. It's not just about building tools, it's about turning wild ideas into tokenized, community-backed realities.

This is where meme-powered creativity meets real-world utility. Whether you're a degenerate with a dream or a builder with a big brain, STIBA ICM Labs gives you the infrastructure to launch, grow, and scale your project with speed and simplicity.

What You Can Do with STIBA ICM Labs:

✦ Tokenize Your Idea in 2 Clicks

Got a vision? Turn it into a live token — fast. No coding, no waiting. Just launch.

✦ AI-Powered Promotion

Our built-in AI Promoter connects your project to early adopters, hype chasers, and serious backers.

✦ Earn Instant ETH Fees

As soon as your token goes live, you earn 0.5% ETH on every buy. Your ideas pay you from Day 1.

✦ Build Utilities That Matter

Add real value with customizable utilities like airdrops, burns, staking rewards, and gamified mechanics.

At STIBA ICM Labs, nothing is theoretical. If it's bold, it's built. If it memes, it moves. This is where the next wave of community-led tokens begins — not with a pitch deck, but with action. The era of Internet Capital is here, and it starts with you.

Bark Street 101

Bark Street 101 is the educational pillar of the Wall Street Shiba ecosystem - a guided e-learning and journaling platform built to empower the next generation of meme investors, crypto traders, and digital finance enthusiasts. In a space often dominated by noise, FOMO, and technical complexity, Bark Street 101 provides clarity, confidence, and real community-driven learning.

Designed with a playful interface and backed by real trading insights, Bark Street 101 combines structured trading education with interactive journaling tools that help users track their trades, reflect on market decisions, and improve over time. It merges traditional trading wisdom with memetic storytelling, turning dry technical knowledge into an engaging and relatable experience.

What makes Bark Street 101 unique is its integration of AI-powered guidance and SocialFi mechanics. Users can unlock badges, share their trading thoughts with the pack, and even gain visibility on community leaderboards, transforming learning into a game of growth and reputation. Whether you're a curious beginner or a seasoned degenerate refining your edge, Bark Street 101 equips you with both the skills and the mindset to trade like a pro in the Web3 world.

This isn't just education - it's a cultural evolution. Bark Street 101 is where memes meet markets, and where the next great trader could be a dog with a journal and a plan.

How To Join

01

Create & Fuel Your Wallet

Already have a Web3 wallet like MetaMask or Trust Wallet? You're good to go. If not, install one and click "Connect Wallet" on our site. Top it up with ETH or BNB, whichever fits your trading style.

Choose Your Amount

Pick your token (ETH or BNB) and enter how much \$STIBA you want to secure. According to experienced experts, starting with at least \$500 could position you well for future portfolio growth.

02

Buy & Chill (or Stake)

Click "Buy Now", confirm the transaction in your wallet, and you're done. Want your \$STIBA to work while you sleep? Stake it right after and earn passive rewards like a pro.

03

How Staking Works

With **\$STIBA staking**, holders can put their tokens to work and earn up to 5132% APY, made possible by early-stage emissions, AI-driven yield strategies, and a smart liquidity-growth model. This powerful reward system is designed to incentivize early adoption and long-term commitment, but it's not a free-for-all. To maintain ecosystem stability and reduce farming and dumping, all staked \$STIBA must remain locked for a minimum of 10 days. The longer you stake, the more \$STIBA you earn.

Caution: Unstaking earlier than 10 days can risk losing all your staked amount, so proceed only if you're committed to locking in for the full duration.

This lock period establishes a fair and secure foundation, enabling AI models within STIBA Labs to optimize yield flows across the DeFi landscape. With real-time adjustments, dynamic compounding, and auto-balancing tools, stakers benefit from smarter returns, not just bigger ones. Flexible pool options will follow in later phases. Still, early adopters who commit to the 10-day minimum can unlock massive yield, access to premium features on the STIBA Trading Terminal, and exclusive tools from Bark Street 101.

Staking isn't just about passive rewards, it's about proving conviction. Lock it, hold it, and let your \$STIBA stack while the market moves. Welcome to high-yield staking for the next generation of meme-fueled finance.

Tokenomics

Token Utility

◆ Access to STIBA ICM Labs

Use \$STIBA to launch your own tokenized ideas, pay for AI-promoted listings, and activate premium tools within the Labs.

◆ Staking Rewards

Stake your \$STIBA to earn up to 5,132% APY. The longer you lock, the higher your returns. Just remember: early unstaking (before 10 days) may forfeit rewards.

◆ Utility Activation

Power up token utilities like airdrops, burns, and custom rewards by holding or spending \$STIBA.

◆ Governance Participation

Shape the future of the ecosystem by using \$STIBA to vote on upcoming products, listings, or community-driven features.

◆ Discounts & Perks

Get reduced fees, exclusive features, and priority access across STIBA AI Exchange, Bark Street 101, and other platform tools.

Roadmap

1

◆ Phase 1: Foundation & Presale

Wall Street Shiba (\$STIBA) launched with a mission to evolve memecoins through intelligence and utility. This phase focused on branding, website launch, community building, and a presale powered by audited tokenomics, viral marketing, and early KOL support.

2

◆ Phase 2: From Hype to Utility

Post-presale, \$STIBA went live on DEXs with liquidity support. STIBA AI Exchange and the Trading Terminal rolled out in alpha, while ICM Labs began developing tools to merge AI with DeFi, laying the groundwork for future products.

3

◆ Phase 3: Learn & Earn

We launched Bark Street 101, a gamified education hub where users earn \$STIBA for mastering trading concepts. Memes, AI, and rewards combined to grow a sharper, more engaged community.

4

◆ Phase 4: Ecosystem Expansion

Upgrades included NLP in STIBA AI Exchange v2, staking pools, and multi-chain expansion (Base, BNB, Solana). Community-driven tools like sentiment bots and indexes reinforced our ICM-native status.

5

◆ Phase 5: Going Global

\$STIBA listings on major CEXs boost accessibility. A revamped Trading Terminal attracts wider users. Strategic partnerships and viral exposure turn \$STIBA into a mainstream meme-market force.

Presale & Listing Strategy

Wall Street Shiba ensures a fully transparent token distribution. There will be no private presales, exclusive allocations, or private privileges. Every token is available to the public on equal terms, with no hidden deals or preferential access granted to any party.

The \$STIBA presale is structured across 40 stages, starting at \$0.00905 per token. With each stage, the price will rise gradually, reaching the final stage price of \$0.01017. However, this pricing may adjust based on demand throughout the presale, meaning the final stage price is not fixed and could vary.

Participants can join the presale using ETH or BNB, with support for multiple networks including Ethereum (ETH), Arbitrum (ARB), and Binance Smart Chain (BSC).

After the presale concludes, \$STIBA will make its debut on decentralized exchanges (DEXs). At the same time, Wall Street Shiba is preparing to roll out listings on major centralized exchanges (CEXs) to enhance global reach and accessibility.

While the names of participating CEXs remain under wraps due to confidentiality agreements, they will be officially revealed once finalized and approved by both parties.

The token will launch at an initial listing price of \$0.05226, giving early supporters a strong value proposition. Listings are scheduled for Q1 2026, strategically timed with the presale's completion and market readiness.

FAQs

1. What is Wall Street Shiba (\$STIBA)?

Wall Street Shiba is the first memecoin that fuses meme culture with AI, DeFi, and Internet Capital Market (ICM) infrastructure. It's more than a token, it's a movement redefining how communities engage with financial tools and opportunities.

2. Where can I buy \$STIBA tokens?

You can purchase \$STIBA tokens through the official Wall Street Shiba website, where the public presale is currently live. Please note that \$STIBA has not yet been listed on any CEX or DEX, so any claims or offers outside the official site should be treated as scams.

3. I bought tokens, where are they now?

After purchasing, your \$STIBA tokens will be visible on our official website, linked to the wallet you used during the transaction. Tokens will be distributed once the presale ends.

4. Is \$STIBA really the next big memecoin?

Absolutely. \$STIBA isn't just hype, it's backed by real products like the STIBA AI Exchange and Bark Street 101, an AI-powered ecosystem, and a strong meme-fueled community. It's meme + market utility, perfectly balanced.

5. They say \$STIBA is the first meme with real AI power. Is it true?

Yes. STIBA is the first memecoin to integrate AI through tools like NLP-based sentiment analytics, trading bots, and predictive dashboards via our STIBA AI Exchange initiative. We're redefining what a memecoin can do, and we're just getting started.

Conclusion

With \$STIBA staking, holders can put their tokens to work and earn up to 5132% APY, made possible by early-stage emissions, AI-driven yield strategies, and a smart liquidity-growth model. This powerful reward system is designed to incentivize early adoption and long-term commitment, but it's not a free-for-all. To maintain ecosystem stability and reduce farming and dumping, all staked \$STIBA must remain locked for a minimum of 10 days. The longer you stake, the more \$STIBA you earn.

Disclaimer

Wall Street Shiba (\$STIBA) is a decentralized meme project intended for entertainment, community engagement, and educational experimentation. It should not be considered financial advice or an investment recommendation. Cryptocurrency trading carries a high level of risk and may not be suitable for all participants. Always conduct your own research (DYOR) and consult with a qualified financial advisor before making investment decisions.

\$STIBA does not guarantee any future value or return, and all holders participate at their own risk. The team behind Wall Street Shiba is not responsible for losses resulting from token purchases, trading, or market volatility. Participation in the project implies acknowledgment and acceptance of these risks.
